

About Us

Here at FFS, we focus our services on families that want to secure their financial future by building credit, investing, retirement accounts, etc. We want to help our families in their journey of building generational wealth, so they can have a better tomorrow. Our families tend to be from low-income first-generation households. Our families trust us to do the best that we can to secure their futures. For a lot of our families, we can not afford to fail, because if we fail, their financial future or stability could disappear.

History of Organization

Froggy's Financial Services is a family-owned financial services company providing financial advice to families throughout the country since 1968. FFS originally started out of the home office when friends of our founder, Stanley Leung, reached out to him for advice regarding credit cards, retirement accounts, etc. After seeing the positive impact that his services were having on his friend's financial stability, our founder decided to start FFS in order to assist families in securing financial stability. Initially located in Rosemead, CA, FFS has expanded to serve families all across California.
